

Technical Bulletin

iForks Battery Charger

Cascade-Ravas iForks has an option for purchasing rechargeable batteries. Early single chargers do not shut off after the batteries are fully charged.

NOTE: Rechargeable batteries are NiMH with a charge capacity of 10,000 mAh.

CAUTION: Do not charge for more than 8 hours. The single chargers do not shut off and will damage the charger.

When the batteries are being charged, a red LED will illuminate.

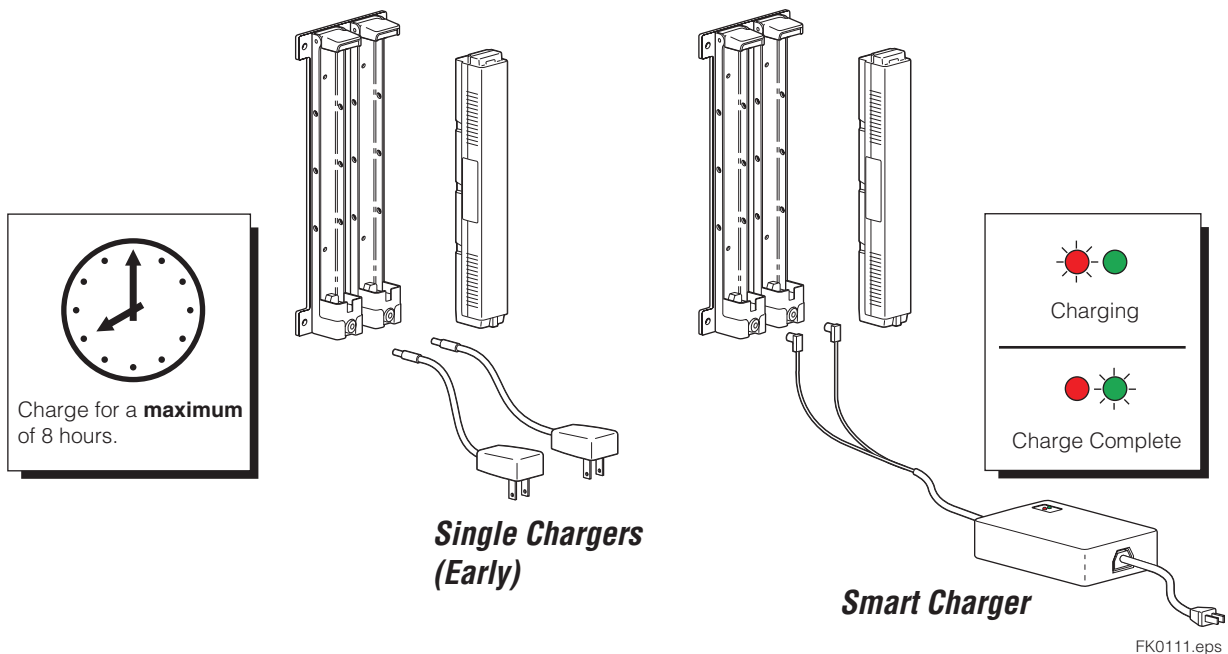

IMPORTANT: When the batteries are fully charged, the red LED remains illuminated.

To replace the single chargers with a smart charger, order 6163066. There is no maximum charging time. The charger shuts off once the batteries are completely charged. The smart charger has two indicator lights: red for batteries charging and green for charge complete.

NOTE: One smart charger replaces the 2 single chargers.

WARNING: Alkaline batteries are not rechargeable. Alkaline battery packs are not compatible with charger. Tampering with Alkaline battery packs can cause damage to the charger and battery packs.

NOTE: This information should not be interpreted as the basis for warranty claims unless so designated.
