Forward-Looking Statements

This Form 10-Q, including “Management’s Discussion and Analysis of Financial Condition and Results of Operations” (Item 2) contains forward-looking statements that involve risks and uncertainties, as well as assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. All statements other than statements of historical fact are statements that could be deemed forward-looking statements, including any projections of revenue, gross profit, expenses, earnings or losses from operations, synergies or other financial items; any statements of plans, strategies, and objectives of management for future operations; any statements regarding future economic conditions or performance; any statements of expectation or belief; and any statements of assumptions underlying any of the foregoing. The risks, uncertainties, and assumptions referred to above include, but are not limited to:

- Competitive factors in, and the cyclical nature of, the materials handling and construction equipment industries;
- Fluctuations in lift truck and construction equipment orders or deliveries;
- Availability and cost of raw materials;
- General business and economic conditions in North America, Europe, Asia Pacific and China;
- Foreign currency fluctuations;
- Pending litigation;
- Environmental matters;
- Levels of public and non-residential construction activity;
- Effectiveness of our capital expenditures and cost reduction initiatives;
- Fluctuations in interest rates;
- Actions by foreign governments;
- Assumptions relating to pension and other postretirement costs.

We undertake no obligation to publicly revise or update forward-looking statements to reflect events or circumstances that arise after the date of this report.

CASCADE CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1—Description of Business

Cascade Corporation is an international manufacturer of materials handling products that are widely used on industrial fork lift trucks and, to a lesser extent, construction, mining and agricultural vehicles. Accordingly, our sales are largely dependent on sales of lift trucks and on the sales of replacement parts. Our sales are made throughout the world. We are headquartered in Fairview, Oregon, employing approximately 2,400 people and maintaining operations in 15 countries outside the United States.

Note 2—Interim Financial Information

The accompanying consolidated financial statements for the interim periods ended October 31, 2007 and 2006 are unaudited. In the opinion of management, the accompanying consolidated financial statements reflect normal recurring adjustments necessary for a fair statement of the financial position, results of operations and cash flows for those interim periods. Results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year, and these financial statements do not contain the detail or footnote disclosures concerning accounting policies and other matters that would be included in full fiscal year financial statements. Therefore, these statements should be read in conjunction with our audited financial statements included in our Annual Report on Form 10-K for the fiscal year ended January 31, 2007.

Note 3—Segment Information

Our operating units have largely similar economic characteristics and attributes, including similar products, distribution patterns and classes of customers. As a result, we aggregate our operating units into four geographic operating segments related to the manufacturing, distribution and servicing of material handling load engagement products. We evaluate performance of each of our operating segments based on operating income, which is income before interest, miscellaneous income/expense and income taxes. The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies contained in Note 2 of our consolidated financial statements included in our Form 10-K for the fiscal year ended January 31, 2007.

Revenues and operating results are classified according to the country of origin. Identifiable assets are attributed to the geographic location in which they are located. Net sales, operating results and identifiable assets by geographic region were as follows (in thousands):

During the nine months ended October 31, 2007, goodwill increased \$16.6 million due to fluctuations in foreign currencies. The remaining increase in goodwill between October 31, 2007 and January 31, 2007 relates to acquisitions. We have no goodwill recorded in China. The following table provides a breakdown of goodwill by geographic region (in thousands):

	October 31 2007	January 31 2007
North America	\$ 109,075	\$ 85,903
Europe	11,698	10,598
Asia Pacific	2,960	2,997
	<u>\$ 123,733</u>	<u>\$ 99,498</u>

Note 6—Share-Based Compensation Plans

We have granted three types of share-based awards, stock appreciation rights (SARS), restricted stock and stock options under our share-based compensation plans to officers, key managers and directors. The grant prices are established by our Board of Directors' Compensation Committee at the time the awards are granted. We issue new common shares upon the exercise of all awards.

SARS provide the holder the right to receive an amount, payable in our common shares, equal to the excess of the market value of our common shares on the date of exercise ("intrinsic value") over the base price at the time the right was granted. The base price may not be less than the market price of our common shares on the date of grant. All SARS vest ratably over a four year period and have a term of ten years.

During the second quarter of fiscal 2008, our shareholders approved a proposal to amend the SARS plan to permit the issuance of restricted shares of common stock. Upon the granting of restricted stock, common shares are issued to the recipient, but the shares may not be sold, assigned, transferred, pledged, or disposed of by the recipient until vested. Regardless of vesting, restricted shares have full voting rights and any dividends declared will be paid to the restricted stock recipient. Restricted shares vest ratably over a period of three years for officers and four years for directors. The number of restricted shares issued to directors is based on the market value of our shares on the date of grant.

The amended SARS plan provides for the issuance of a maximum of 750,000 shares of common stock upon the exercise of SARS or issuance of restricted stock. As of October 31, 2007, a total of 217,000 shares of common stock have been issued under the SARS plan, which includes 42,000 shares of restricted stock with a grant date fair market value of \$73.73 per share.

Stock options provide the holder the right to receive our common shares at an established price. We have reserved 1,400,000 shares of common stock under our stock option plan. As of October 31, 2007, a total of 1,083,000 shares have been issued upon the exercise of stock options. No additional stock options can be granted under the terms of the plan. All outstanding stock options vest ratably over a four year period and have a term of ten years.

A summary of the plans' status at October 31, 2007 together with changes during the nine months then ended are presented in the following tables (in thousands, except per share amounts):

	Stock Options		Stock Appreciation Rights	
	Outstanding Awards	Weighted Average Exercise Price Per Share	Outstanding Awards	Weighted Average Exercise Price Per Share
Balance at January 31, 2007	570	\$ 13.79	1,031	\$ 31.56
Granted	—	—	66	73.73
Exercised	(276)	14.02	(170)	29.87
Forfeited	(6)	19.86	(79)	33.93
Balance at October 31, 2007	<u>288</u>	<u>\$ 13.43</u>	<u>848</u>	<u>\$ 34.96</u>

We calculate share-based compensation cost for SARS and stock options using the Black-Scholes option pricing model. The range of assumptions used to compute share-based compensation are as follows:

	Granted in Fiscal 2008	Granted Prior to Fiscal 2008
Risk-free interest rate	5.1 %	2.3 - 5.0 %
Expected volatility	41 %	40 - 42 %
Expected dividend yield	1.0 %	1.1 - 2.8 %
Expected life (in years)	7	5 - 6
Weighted average fair value at date of grant	\$ 33.31	\$ 4.16 - 17.86

We calculate share-based compensation cost for restricted stock by multiplying the fair market value of our common shares on the grant date by the number of restricted shares expected to vest. The restricted stock share-based compensation is expensed ratably over the applicable vesting period.

As of October 31, 2007, there was \$10.3 million of total unrecognized compensation cost related to nonvested share-based compensation awards granted under the plans, which is expected to be recognized over a weighted average period of 2.4 years. The following table represents as of October 31, 2007 the share-based compensation costs to be recognized in future periods (in thousands) for awards granted to date:

Fiscal Year	Amount
2008*	\$ 1,301
2009	4,563
2010	3,057
2011	1,157
2012	198
	<u>\$ 10,276</u>

* Represents last three months of fiscal 2008.

Note 7—Commitments and Contingencies

Environmental Matters

We are subject to environmental laws and regulations, which include obligations to remove or mitigate environmental effects of past disposal and release of certain wastes and substances at various sites. We record liabilities for affected sites when environmental assessments indicate probable cleanup and the costs can be reasonably estimated. Other than for costs of assessments themselves, the timing and amount of these liabilities is determined based on the estimated costs of remediation activities and our commitment to a formal plan of action, such as an approved remediation plan. The reliability and precision of the loss estimates are affected by numerous factors, such as different stages of site evaluation and reevaluation of the degree of remediation required. We adjust our liabilities as new remediation requirements are defined, as information becomes available permitting reasonable estimates to be made and to reflect new and changing facts.

It is reasonably possible that changes in estimates will occur in the near term and the related adjustments to environmental liabilities may have a material impact on our net income. Unasserted claims are not currently reflected in our environmental remediation liabilities. It is also reasonably possible that these claims may also have a material impact on our net income if asserted. We cannot estimate at this time the amount of any additional loss or range of loss that is reasonably possible.

Our specific environmental matters consist of the following:

Fairview, Oregon

In 1996, the Oregon Department of Environmental Quality issued two Records of Decision affecting our Fairview, Oregon manufacturing facility. The Records of Decision required us to initiate remedial activities related to the cleanup of groundwater contamination at and near the facility. Remediation activities have been conducted since 1996 and current estimates provide for some level of activity to continue through 2019. Costs of certain remediation activities at the facility are shared with The Boeing Company, with Cascade paying 70% of these costs. The recorded liability for ongoing remediation activities at our Fairview facility was \$5.2 million and \$5.9 million at October 31, 2007 and January 31, 2007, respectively.

Springfield, Ohio

In 1994, we entered into a consent order with the Ohio Environmental Protection Agency, which required the installation of remediation systems for the cleanup of groundwater contamination at our Springfield, Ohio facility. The current estimate is that the remediation activities will continue through 2013. The recorded liability for ongoing remediation activities in Springfield was \$879,000 at October 31, 2007 and \$1.0 million at January 31, 2007.

Insurance Litigation

On April 9, 2007, we entered into a settlement agreement with Employers Reinsurance Corporation with respect to litigation to recover various expenses incurred in connection with environmental and related proceedings. The recovery from the settlement, recorded during the three months ended April 30, 2007, was \$16.0 million, net of expenses. In connection with the settlement, we released all rights we might have under insurance policies issued by Employers Reinsurance Corporation and certain related entities. This concluded all litigation against our insurance companies with regard to environmental matters.

Legal Proceedings

We are subject to legal proceedings, claims and litigation, in addition to the environmental matters previously discussed, arising in the ordinary course of business. While the outcome of these matters is currently not determinable, management does not expect the ultimate costs to be material to our consolidated financial position, result of operations, or cash flows.

Note 8—Earnings Per Share

The following table presents the calculation of basic and diluted earnings per share (in thousands, except per share amounts):

	<u>Three Months Ended October 31</u>		<u>Nine Months Ended October 31</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Basic earnings per share:				
Net income	\$ 12,420	\$ 12,283	\$ 51,360	\$ 35,240
Weighted average shares of common stock outstanding	11,965	12,604	11,954	12,572
	\$ 1.04	\$ 0.97	\$ 4.30	\$ 2.80
Diluted earnings per share:				
Net income	\$ 12,420	\$ 12,283	\$ 51,360	\$ 35,240
Weighted average shares of common stock outstanding	11,965	12,604	11,954	12,572
Dilutive effect of stock options and stock appreciation rights	426	446	533	516
Diluted weighted average shares of common stock outstanding	12,391	13,050	12,487	13,088
	\$ 1.00	\$ 0.94	\$ 4.11	\$ 2.69

Basic earnings per share is based on the weighted average number of common shares outstanding for the period. Diluted weighted average common shares includes the incremental shares that would be issued upon the assumed exercise of stock options and stock appreciation rights and the amount of unvested restricted stock. Unexercised SARs totaling 66,000 awards were excluded from the fiscal 2008 three months and nine months calculations of diluted earnings per share because they were antidilutive. The remaining SARs and all stock options and restricted stock were included in our calculation of incremental shares because they are dilutive.

Note 11—Recent Accounting Pronouncements

SFAS 157—In September 2006, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standards (“SFAS”) No. 157 (SFAS 157), “Fair Value Measurements.” SFAS 157 provides a common definition of fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. Application of SFAS 157 is required for our financial statements for the fiscal year beginning February 1, 2008. We are currently evaluating the impact of SFAS 157 on our financial statements.

SFAS 158—In September 2006, the FASB issued SFAS No. 158 (SFAS 158), “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R).” This statement requires balance sheet recognition of the overfunded or underfunded status of pension and postretirement benefit plans. Under SFAS 158, actuarial gains and losses, prior service costs or credits, and any remaining transition assets or obligations that have not been recognized under previous accounting standards must be recognized in other comprehensive income, net of tax effects, until they are amortized as a component of net periodic benefit cost. In addition, the measurement date, the date at which plan assets and the benefit obligation are measured, is required to be the company’s fiscal year end. Presently, we use a December 31 measurement date for the postretirement benefit plan, which will change to coincide with our January 31 fiscal year-end date. As required by SFAS 158, we adopted the balance sheet recognition provision as of January 31, 2007. The measurement date provision is effective for the fiscal year beginning February 1, 2008. We are currently evaluating the impact of the measurement date provision of SFAS 158 on our consolidated financial statements.

SFAS 159—In February 2007, the FASB issued SFAS No. 159 (SFAS 159), “The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of FASB Statement No. 115.” SFAS 159 allows companies the choice to measure many financial instruments and certain other items at fair value. Application of SFAS 159 is required for our financial statements beginning February 1, 2008. We are currently reviewing the impact of this pronouncement on our consolidated financial statements.

Note 12—Warranty Obligations

We record a liability on our consolidated balance sheet for costs related to warranties with the sales of our products. This liability is estimated through historical customer claims, product failure rates, material usage and service delivery costs incurred in correcting a product failure. Our warranty obligations, which are recorded in other accrued expenses on the consolidated balance sheets, were as follows (in thousands):

	2007	2006
Balance at January 31	\$ 1,754	\$ 1,665
Accruals for warranties issued during the period	1,929	1,922
Accruals for pre-existing warranties	—	(13)
Settlements during the period	(1,786)	(1,868)
Balance at October 31	<u>\$ 1,897</u>	<u>\$ 1,706</u>

Note 13—Accumulated Other Comprehensive Income

The following table presents the changes in and the components of accumulated other comprehensive income (in thousands):

	Accumulated Other Comprehensive Income (Loss)		
	Translation Adjustment	Minimum Pension Liability Adjustment	Total
Balance at January 31, 2007	\$ 14,675	\$ (2,381)	\$ 12,294

Minimum pension/postretirement adjustment	—	18	18
Balance at October 31, 2007	<u>\$ 42,071</u>	<u>\$ (2,363)</u>	<u>\$ 39,708</u>

Note 14—Gain on Sale of Assets

During the second quarter of fiscal 2008, we recognized a \$1.1 million gain on the sale of land in Fairview, Oregon.

During the first quarter of fiscal 2007, we recognized a \$715,000 gain on the sale of our manufacturing facility in Hoorn, The Netherlands. We had closed this facility in fiscal 2006.

Note 15—Acquisitions

During the second quarter of fiscal 2008, we purchased 100% of the stock of American Compaction Equipment, Inc., a manufacturer of construction attachments located in San Juan Capistrano, California. The total purchase price was approximately \$11.5 million, net of assumed liabilities. Results of operations for American Compaction Equipment, Inc. have been included in our consolidated statement of income since the acquisition date of May 1, 2007. We have not included pro forma financials as though the acquisition had occurred on February 1, 2007, due to materiality.

Note 16—Income Taxes

Effective February 1, 2007, we adopted the provisions of FASB Interpretation No. 48 (“FIN 48”) which prescribes a more-likely-than-not threshold for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition of income tax assets and liabilities, classification of current and deferred income tax assets and liabilities, accounting for interest and penalties associated with tax positions, accounting for income taxes in interim periods and income tax disclosures.

As of February 1, 2007, our liability for uncertain tax positions was \$325,000. As a result of the implementation of FIN 48, we recognized no material adjustment in the liability for uncertain tax positions. Our policy is to classify tax-related interest and penalties as income tax expense.

We are subject to taxation primarily in the U.S., Canada and China, as well as various state and other foreign jurisdictions. The Internal Revenue Service is currently reviewing our U.S. income tax return for fiscal years 2004 - 2007. As of February 1, 2007, we remained subject to examination in various state and foreign jurisdictions for the 1996-2006 tax years.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Our businesses globally manufacture and distribute material handling load engagement products primarily for the lift truck industry and to a lesser extent the construction industry. We operate in four geographic segments: North America, Europe, Asia Pacific and China. All references to fiscal periods are defined as the periods ended October 31, 2006 (fiscal 2007) and the periods ended October 31, 2007 (fiscal 2008).

COMPARISON OF THIRD QUARTER OF FISCAL 2008 AND FISCAL 2007

Executive Summary

	Three Months Ended October 31		Change	Change %
	2007	2006		
	(In thousands except per share amounts)			
Net sales	\$ 143,143	\$ 122,809	\$ 20,334	17 %
Operating income	\$ 20,627	\$ 19,210	\$ 1,417	7 %
Net income	\$ 12,420	\$ 12,283	\$ 137	1 %
Diluted earnings per share	\$ 1.00	\$ 0.94	\$ 0.06	6 %

Higher levels of net sales, operating income and net income in the third quarter of fiscal 2008 compared to the third quarter of fiscal 2007 are primarily the result of the strength of lift truck markets in Europe, China and Asia Pacific, acquisitions in North America and our capital expansion plan in China. Lift truck shipments globally increased 9% compared to the prior year. Excluding the impact of foreign currency, net sales increased 13% during the third quarter of fiscal 2008.

Operating income	\$ 15,108	18 %	\$ 16,065	21 %	\$ (957)	(6) %

The following are financial highlights for North America for the third quarter of fiscal 2008:

- Higher sales are primarily the result of the acquisitions of Pacific Services & Manufacturing, Inc. and American Compaction Equipment, Inc. made in the fourth quarter of fiscal 2007 and the second quarter of fiscal 2008, respectively. Excluding sales related to our acquisitions and changes in currencies, net sales were flat for the quarter.
- North America lift truck industry shipments from fiscal 2007 to fiscal 2008 decreased 13%. We have found that lift truck industry statistics provide an indication of the direction of our business activity. However, changes in our net sales do not correspond directly to the percentage changes in lift truck industry shipments.
- Transfers to other Cascade geographic areas increased 35% during fiscal 2008 compared to fiscal 2007, due to increased customer demand globally.
- Our gross profit percentage decreased slightly from 36% in fiscal 2007 to 34% in fiscal 2008, due to higher material costs and changes in product mix.
- Excluding currency changes, selling and administrative costs increased 12%. Expenses related to our acquisitions, higher personnel costs and consulting charges account for this increase. As a percentage of net sales and transfers, selling and administrative costs remained consistent at 15%.
- Higher amortization costs in fiscal 2008 relate to the amortization of intangible assets from our acquisitions.

The following are financial highlights for Europe for the third quarter of fiscal 2008:

- Net sales increased 17%, excluding currency changes, reflecting a strong European lift truck market.
- European lift truck industry shipments increased 20% compared to the prior year.
- Our gross profit percentage remained consistent at 16% during fiscal 2008 and fiscal 2007. The benefits of fixed cost absorption due to higher sales and production levels were offset by increases in material costs and higher freight and personnel expenses.

- Selling and administrative expenses increased 7%, excluding currency changes, due to higher sales, marketing, personnel and other general administrative costs. As a percentage of net sales and transfers, selling and administration costs remained consistent at 16%.

The following are financial highlights for Asia Pacific for the third quarter of fiscal 2008:

- Excluding currency changes, net sales increased 17% during fiscal 2008, reflecting increases in sales at all locations throughout the region due to the strength of current lift truck markets.
- Lift truck industry shipments in Asia Pacific increased 13% in fiscal 2008.
- The gross profit percentage in Asia Pacific for fiscal 2008 increased 1%, due to the sourcing of lower cost products from China.
- Selling and administrative costs decreased 5% in fiscal 2008, excluding the impact of currency changes, due to personnel and general cost decreases.

The following are financial highlights for China for the third quarter of fiscal 2008:

- During fiscal 2008, net sales increased 33%, excluding the impact of currency changes. Our recent capital expansion plan in China has enabled us to manufacture a larger volume of products. We are currently seeing the benefits of this effort with our increased sales activity.
- Lift truck shipments in China increased 20% in fiscal 2008.
- Transfers to other Cascade geographic areas, primarily Asia Pacific and Europe, increased 142% during fiscal 2008 due to the recent expansion of operations in China.
- Current year gross profit percentage decreased to 30% from 34% in the prior year. This decrease is primarily the result of increased intercompany sales, changes in product mix and higher material costs.

- Excluding the impact of currency changes, selling and administrative costs increased 33% due to additional costs to support our expanded operations in China. As a percentage of net sales and transfers, selling and administration costs decreased from 8% in fiscal 2007 to 6% for fiscal 2008.

Non-Operating Items

During the third quarter of fiscal 2008, interest expense increased \$462,000 compared to the prior year as a result of increased borrowings to fund various initiatives, including our share repurchase program and our acquisition of America Compaction Equipment, Inc. These initiatives also resulted in a decrease in our cash and marketable securities balance and a corresponding \$411,000 decrease in interest income during the current year.

The increase in other expense in the third quarter of fiscal 2008 is due to foreign currency losses, which are the result of stronger foreign currencies compared to the U.S. dollar during the current year.

The effective tax rate decreased 2% in the third quarter of fiscal 2008 from 37% in the prior year. The decrease was primarily related to lower state taxes and changes in income between jurisdictions with differing tax rates. These decreases were partially offset by additional valuation allowances from pre-tax losses in Europe.

Lift Truck Market Outlook

Based on our review of preliminary industry data we believe the general lift truck market outlook for the remainder of fiscal 2008 is as follows:

- The market in North America will continue to be down compared to the prior year.
- Europe will continue at current levels through the remainder of the year.
- The market in Asia Pacific will remain at current levels through the remainder of the year.
- The market in China will continue to experience its current rate of growth through the remainder of the year.

COMPARISON OF THE FIRST NINE MONTHS OF FISCAL 2008 AND FISCAL 2007

Executive Summary

	Nine Months Ended October 31		Change	Change %
	2007	2006		
	(In thousands except per share amounts)			
Net sales	\$ 421,826	\$ 359,959	\$ 61,867	17 %
Operating income	\$ 81,463	\$ 54,513	\$ 26,950	49 %
Net income	\$ 51,360	\$ 35,240	\$ 16,120	46 %
Diluted earnings per share	\$ 4.11	\$ 2.69	\$ 1.42	53 %

Higher levels of net sales, operating income and net income in the first nine months of fiscal 2008 compared to the first nine months of fiscal 2007, excluding the litigation insurance settlement, are primarily the result of the strength of lift truck markets in Europe, China and Asia Pacific, acquisitions in North America and our capital expansion plan in China. Lift truck shipments globally increased 9% compared to the prior year. Excluding the impact of foreign currency, net sales increased 14% during the first nine months of fiscal 2008.

In addition, we settled an insurance litigation matter during the first quarter of fiscal 2008 which accounted for a \$16 million increase to operating income compared to the prior year. The calculated diluted earnings per share, excluding the insurance litigation recovery is \$3.31 for the first nine months ended October 31, 2007 compared to \$2.69 in the prior year. We believe the exclusion of the insurance litigation recovery provides a more appropriate comparison with the prior year results. The calculation of diluted earnings per share, excluding the insurance litigation recovery, is as follows (in thousands, except per share amount):

	Nine months ended October 31, 2007
Net income as reported	\$ 51,360

The following are financial highlights for North America for the first nine months of fiscal 2008:

- Higher sales in fiscal 2008 are primarily the result of the acquisitions made in the fourth quarter of fiscal 2007 and the second quarter of fiscal 2008. Excluding net sales for acquisitions and the impact of currency changes, net sales increased 1%.
- North America lift truck industry shipments from 2007 to 2008 decreased 9%. We have found that lift truck industry statistics provide an indication of the direction of our business activity. However, changes in our net sales do not correspond directly to the percentage changes in lift truck industry shipments.
- Transfers to other Cascade geographic areas increased 35% during fiscal 2008 compared to fiscal 2007 due to increased customer demand globally.
- Our gross profit percentage decreased 1% during fiscal 2008 compared to fiscal 2007, due to higher material costs and changes in product mix.
- Selling and administrative costs increased 9%, excluding currency changes, mainly due to acquisitions and personnel costs. As a percentage of net sales and transfers, selling and administrative costs decreased from 16% in fiscal 2007 to 15% for fiscal 2008.
- During the second quarter of fiscal 2008 we realized a gain of \$1.1 million on the sale of land in Fairview, Oregon.
- Higher amortization costs in fiscal 2008 relate to the amortization of intangible assets from our acquisitions.
- During the first quarter of fiscal 2008, we entered into a settlement agreement with Employers Reinsurance Corporation with respect to litigation to recover various expenses incurred in connection with environmental and related proceedings. The recovery from this settlement was \$16.0 million, net of expenses.

The following are financial highlights for Europe for the first nine months of fiscal 2008:

- During fiscal 2008, net sales increased 18%, excluding currency changes, reflecting a strong European lift truck market.
- European lift truck industry shipments increased 21% compared to the prior year.
- Our gross profit percentage remained consistent at 17% during fiscal 2008 and fiscal 2007. The benefits of fixed cost absorption due to higher sales and production levels were offset by increases in material costs and higher freight and personnel expenses.
- Excluding the impact of currency changes, selling and administrative expenses increased 5% in Europe, because of higher sales and marketing costs. As a percentage of net sales and transfers, selling and administrative costs decreased from 17% in fiscal 2007 to 15% for fiscal 2008.

The following are financial highlights for Asia Pacific for the first nine months of fiscal 2008:

- Excluding currency changes, net sales increased 20% during fiscal 2008. This increase occurred in all locations throughout the region.
- Lift truck industry shipments in Asia Pacific increased 7% in fiscal 2008 compared to fiscal 2007.
- The gross profit percentage in Asia Pacific increased 1% for fiscal 2008 compared to fiscal 2007, due to the sourcing of lower cost product from China.
- Excluding the impact of currency changes, selling and administrative costs decreased 3% in the current year, due to personnel and general cost decreases.

The following are financial highlights for China for the first nine months of fiscal 2008:

- During fiscal 2008, net sales increased 30%, excluding the impact of currency changes. Our recent capital expansion plan in China has enabled us to manufacture a larger volume of products. We are currently seeing the benefits of this effort with our increased sales activity.
- Lift truck shipments in China increased 20% in fiscal 2008.
- Transfers to other Cascade geographic areas, primarily Asia Pacific and Europe, increased 113% during fiscal 2008, due to the recent expansion of operations in China.
- The current year gross profit percentage remained consistent at 33% compared to the prior year. The benefit of sourcing certain raw materials and components from within China was offset by lower margins due to changes in product mix and increased intercompany sales.
- Selling and administrative costs increased 33%, excluding currency changes during fiscal 2008, due to additional costs to support our expanded operations in China. As a percentage of net sales and transfers, selling and administrative costs decreased from 8% in fiscal 2007 to 7% in fiscal 2008.

Non-Operating Items

During the first nine months of fiscal 2008, interest expense increased \$1.4 million compared to the prior year as a result of increased borrowings to fund various initiatives including our share repurchase program and our acquisition of American Compaction Equipment, Inc. These initiatives also resulted in a decrease in our cash and marketable securities balance and a \$911,000 decrease in interest income during the current year.

The increase in other expense during the first nine months of fiscal 2008 was primarily the result of foreign currency losses due to stronger foreign currencies compared to the U.S. dollar during the current year.

Our year-to-date effective tax rate of 34% is lower than the 36% rate for the first nine months of the prior year. The decrease is primarily related to lower state taxes, proportionally high income levels in fiscal 2008 in China, which has a lower tax rate compared to other Cascade locations and year-to-date valuation allowances from pre-tax losses in Europe, which have decreased in relation to total pre-tax income.

CASH FLOWS

The statements of cash flows reflect the changes in cash and cash equivalents for the nine months ended October 31, 2007 and October 31, 2006 by classifying transactions into three major categories of activities: operating, investing and financing.

Operating

Our primary source of liquidity is cash generated from operating activities. This consists of net income adjusted for noncash operating items such as depreciation and amortization, losses and gains on disposition of assets, share-based compensation, deferred income taxes and changes in operating assets and liabilities.

Net cash provided by operating activities from continuing operations was \$43.6 million in the first nine months of fiscal 2008 compared to \$35.5 million for the same period in fiscal 2007. The increase in cash provided by operating activities in fiscal 2008 was due to an increase in net income, which includes proceeds from the insurance litigation recovery, and changes in accounts payable, accrued expenses and deferred income taxes. These changes were partially offset by increases in accounts receivable and inventory due to higher sales and sourcing of product globally.

Investing

Our capital expenditures are primarily for equipment and tooling related to product improvements, more efficient production methods, expansion of production capacity and replacement for normal wear and tear. Capital expenditures by geographic segments were as follows (in thousands):

	Three Months Ended October 31		Nine Months Ended October 31	
	2007	2006	2007	2006
North America	\$ 2,505	\$ 1,159	\$ 6,006	\$ 4,886
Europe	1,983	475	3,344	1,467
Asia Pacific	292	131	741	275
China	376	3,877	4,171	5,262
	<u>\$ 5,156</u>	<u>\$ 5,642</u>	<u>\$ 14,262</u>	<u>\$ 11,890</u>

We expect capital expenditures for the rest of fiscal 2008 to approximate our third quarter fiscal 2008 depreciation expense. We currently anticipate additional investments of up to \$5 million in China and \$6 million in Asia Pacific over the next twelve months. Depreciation expense for the first nine months in fiscal 2008 and fiscal 2007 was \$10.3 million for both periods.

During the second quarter of fiscal 2008, we purchased 100% of the stock of American Compaction Equipment, Inc., a manufacturer of construction attachments located in San Juan Capistrano, California. The total purchase price was approximately \$11.5 million, net of assumed liabilities.

Financing

We declared dividends totaling \$0.52 and \$0.45 per share during the first nine months of fiscal 2008 and 2007, respectively.

The issuance of common stock related to the exercise of stock options and stock appreciation rights generated \$3.8 million and \$1.8 million of cash for the first nine months of fiscal 2008 and 2007, respectively.

We paid \$43.5 million and \$12.8 million to repurchase common stock during the first nine months of fiscal 2008 and fiscal 2007, respectively.

Net proceeds from long-term debt during the first nine months of fiscal 2008 was \$10.6 million and funded various initiatives including the share repurchase program and acquisition of American Compaction Equipment, Inc.

FINANCIAL CONDITION AND LIQUIDITY

Our working capital, defined as current assets less current liabilities, at October 31, 2007 was \$134.4 million as compared to \$113.1 million at January 31, 2007. Our current ratio at October 31, 2007 increased to 2.7 to 1 compared to 2.6 to 1 at January 31, 2007.

Total outstanding debt, including notes payable to banks at October 31, 2007 was \$62.5 million and at January 31, 2007 was \$51.1 million. Our debt agreements contain covenants relating to net worth and leverage ratios. We were in compliance with these covenants at October 31, 2007. Borrowing arrangements currently in place with commercial banks provide lines of credit totaling \$125 million, of which \$45.0 million was outstanding and \$3.5 million was used to issue letters of credit at October 31, 2007. The lines of credit expire on December 7, 2011. The interest rate on the lines of credit, which is based on LIBOR plus a margin of 0.75%, was 5.6% at October 31, 2007 and January 31, 2007. Average interest rates on notes payable to banks were 5.6% at October 31, 2007 and 4.9% at January 31, 2007.

Our current plans are to fund our existing postretirement obligation as costs are incurred. Any defined benefit obligations will be funded to meet minimum statutory funding requirements or any additional funding requirements which we have committed to in specific plan agreements. Currently, these additional funding requirements are limited to annual contributions of \$400,000 through fiscal year 2011 to a defined benefit plan in England. During the first quarter of fiscal 2008, we made our second annual contribution to this defined benefit plan.

On September 5, 2006, our Board of Directors authorized a share repurchase program of up to \$80 million over a two year period. During the first six months of fiscal 2008, we repurchased and retired 389,000 shares of common stock. During the third quarter of fiscal 2008, we repurchased and retired 303,000 shares of common stock, which completed this program. In total, we repurchased 1,448,000 shares of common stock for \$80 million, for an average price per share of \$55.24.

On September 24, 2007 we announced that our Board of Directors had authorized a new share repurchase program of up to \$50 million over a two-year period. Repurchases will be made based on market conditions, relevant securities laws and other factors. During the third quarter of fiscal 2008 we did not repurchase any shares of common stock under this new program. As of December 4, 2007, we had repurchased 303,000 shares for \$18.0 million.

We believe that our cash and cash equivalents, existing credit facilities and cash flows from operations will be sufficient to satisfy our expected working capital, capital expenditure, acquisition, share buyback and debt retirement requirements for the next twelve months.

OTHER MATTERS

The U.S. dollar weakened in the first nine months of fiscal 2008 in comparison to most foreign currencies used by our significant foreign operations, which are the Euro, Canadian Dollar, Chinese Yuan and British Pound. As a result, foreign currency translation adjustments increased shareholders' equity by \$15.3 million and \$27.4 million in the third quarter and first nine months of fiscal 2008, respectively.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our discussion and analysis of financial position and results of operations is based on our consolidated financial statements which have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. We evaluate our estimates and judgments on an on-going basis, including those related to uncollectible receivables, inventories, goodwill and long-lived assets, warranty obligations, environmental liabilities and deferred taxes. We base our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. A description of our critical accounting policies and related judgments and estimates that

affect the preparation of our consolidated financial statements is set forth in our Annual Report on Form 10-K for the year ended January 31, 2007.

OFF BALANCE SHEET ARRANGEMENTS

At October 31, 2007, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or for other contractually narrow or limited purposes. As such, we are not materially exposed to any financing, liquidity market or credit risk that could arise if we had engaged in such relationships.

RECENT ACCOUNTING PRONOUNCEMENTS

SFAS 157—In September 2006, the FASB issued SFAS No. 157 (SFAS 157), “Fair Value Measurements.” SFAS 157 provides a common definition of fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. Application of SFAS 157 is required for our financial statements for the fiscal year beginning February 1, 2008. We are currently evaluating the impact of SFAS 157 on our financial statements.

SFAS 158—In September 2006, the FASB issued SFAS No. 158 (SFAS 158), “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans—An Amendment of FASB Statements No. 87, 88, 106, and 132(R).” This statement requires balance sheet recognition of the overfunded or underfunded status of pension and postretirement benefit plans. Under SFAS 158, actuarial gains and losses, prior service costs or credits, and any remaining transition assets or obligations that have not been recognized under previous accounting standards must be recognized in other comprehensive income, net of tax effects, until they are amortized as a component of net periodic benefit cost. In addition, the measurement date, the date at which plan assets and the benefit obligation are measured, is required to be the company’s fiscal year end. Presently, we use a December 31 measurement date for our postretirement benefit plan, which will change to coincide with our January 31 fiscal year-end date. As required by SFAS 158, we adopted the balance sheet recognition provision as of January 31, 2007. The measurement date provision is effective for the fiscal year beginning February 1, 2008. We are currently evaluating the impact of the measurement date provision of SFAS 158 on our consolidated financial statements.

SFAS 159—In February 2007, the FASB issued SFAS No. 159 (SFAS 159), “The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of FASB Statement No. 115.” SFAS 159 allows companies the choice to measure many financial instruments and certain other items at fair value. Application of SFAS 159 is required for our financial statements beginning February 1, 2008. We are currently reviewing the impact of this pronouncement on our consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential loss arising from adverse changes in market rates and prices, such as foreign currency exchange rate and interest rate fluctuations. A significant portion of our revenues and expenses are denominated in foreign currencies. As a result, our operating results could become subject to significant fluctuations based upon changes in the exchange rates of the foreign currencies in relation to the U.S. dollar.

The table below illustrates the hypothetical increase in net sales for the third quarter of fiscal 2008 resulting from a 10% weaker U.S. dollar during the quarter, measured against foreign currencies that affect our operations (in millions):

Euro	\$	3.3
Chinese yuan		1.1
British pound		0.9
Canadian dollar		0.7
Japanese yen		0.6
Other currencies (representing 7% of consolidated net sales)		1.0

A 10% weaker U.S. dollar during the quarter, measured against foreign currencies that affect our operations, would have an immaterial impact on our operating income.

We enter into foreign currency forward exchange contracts to offset the impact of currency fluctuations on certain nonfunctional currency assets and liabilities. The principal currencies hedged are denominated in Japanese yen, Canadian dollars, Euros and British pounds. Our foreign currency forward exchange contracts have terms lasting up to six months, but generally less than one month. We do not enter into derivatives or other financial instruments for trading or speculative purposes.

A majority of our products are manufactured using steel as the primary raw material and steel based components as purchased parts. As such, our cost of goods sold is sensitive to fluctuations in steel prices, either directly through the purchase of steel as raw material or indirectly through the purchase of steel based components. Presuming that the full impact of commodity steel cost increases is reflected in all steel and steel based component purchases, we estimate our gross profit percentage sensitivity to be approximately 0.3% for each 1.0% increase in commodity steel cost without offsetting sales price increases. For example, if the price of commodity steel increases 1.0%, and the full impact of that increase is reflected in all raw material and component purchases, the net decrease in the gross profit percentage would be approximately 0.3%. Based on our statement of income for the quarter ended October 31, 2007, a 1% increase in commodity steel costs without offsetting sales price increases would have decreased consolidated gross profit by approximately \$396,000.

To date we have been able to mitigate the effect of a portion of steel cost increases on our gross profit. This has been done through price increases, process improvements and production cost reductions. We intend to continue our efforts to mitigate the impact of any additional steel cost increases. There may be some time lag between the absorption of the steel cost increases and realizing the offsetting benefits of the mitigating measures. It should be noted that there is no assurance that we can fully mitigate all future steel cost increases through price increases and other measures and actual cost increases from steel suppliers could differ from cost increases that have been previously communicated.

Manufacturing of our products includes the purchase of various raw materials and components. Certain of these items are provided worldwide by a limited number of suppliers. We are not currently experiencing shortages in obtaining the raw materials and components. However, certain steel products obtained in Europe are subject to allocations from suppliers. At this time, we believe the current allocation of these products from suppliers is sufficient to meet planned production volumes. Nevertheless, there can be no assurance that these suppliers will be able to meet our future requirements. An extended delay or interruption in the supply of any components could have a material adverse effect on our business, results of operations and financial condition. We are working to identify alternative supplier sources for these products.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our chief executive officer and chief financial officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the "Exchange Act"). Based on that evaluation, our chief executive officer and chief financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective in ensuring that information required to be disclosed in our Exchange Act reports is (1) recorded, processed, summarized and reported in a timely manner, and (2) accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There has been no change in the internal control over financial reporting that occurred during the nine months ended October 31, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
