

High-Low Pressure Regulator Kit 6804769

This manual provides instructions for Cascade High-Low Pressure Regulator Kit 68047669 for carton clamps. The kit includes a valve, a driver operated high-low switch and an indication light bar.

Cascade recommends using a low pressure tank line kit for a dedicated return connection to the truck tank.

Call: 1-888-227-2233 Fax: 1-888-329-0234 Internet: www.cascorp.com Write: Cascade Corporation, 2501 Sheridan Ave., Springfield, OH 45505

Installation

- **1** Disconnect the cable from the positive battery terminal.
- 2 Locate and install the pressure valve on the truck cowl or under the floorboard using 5/16 in. (8 mm) capscrews. If mounting on the cowl, watch for clearance when the mast is tilted back. The pressure valve has adjustment screws that need easy access for final adjustment.
- 3 Install a return to tank line to the T port on the bottom of the valve to connect with the truck tank line. Cascade Low Pressure Return Line Adapter Kits are listed below.

Tank Hose ID	Adapter Kit Part No.		
.75 in. (19 mm)	214062		
1.00 in. (25 mm)	211745		
1.25 in. (31 mm)	214066		
1.50 in. (38 mm)	6037507		

- **4** Install a No. 8 tee fitting to the P Port on the side of the High-Low Valve.
- **5** Install a No. 8 hose from the truck clamp auxiliary valve CLAMP port to the P port tee fitting on the side of the High-Low Valve.
- 6 Install a No. 8 hose from the High-Low Valve P Port tee fitting to the supply circuit for the attachment CLAMP port.
- 7 Install a No. 8 hose from the truck clamp auxiliary valve OPEN port to the supply circuit for the attachment OPEN port.

- **8** In a location convenient to the truck operator, locate and mount the High-Low Switch.
- **9** Locate and mount the Light Bar on the back of the overhead guard.

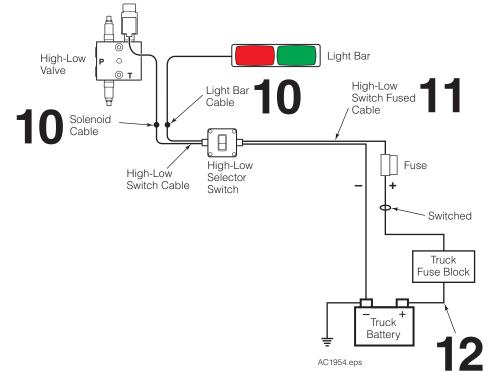

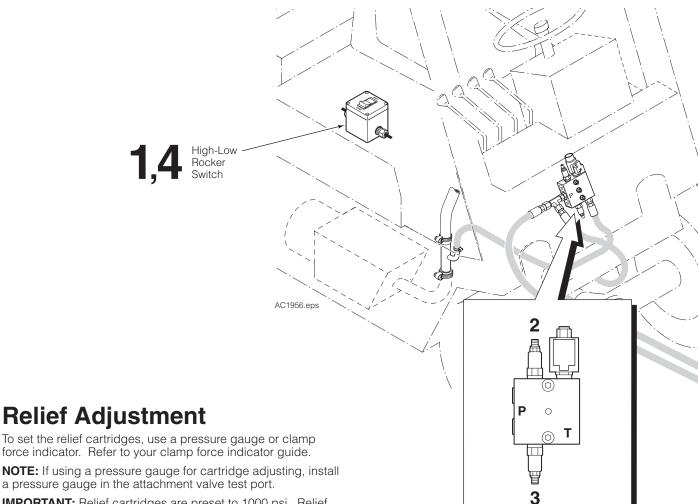

10 As required, connect the light bar cable and solenoid cable to the High-Low Switch. Use the diagram and table, shown. Check the cable routing for pinch points and clearance. Use wire ties as needed.

CAUTION: Consult the Lift Truck OEM for proper + power source connection.

- **11** Connect the fused positive wire to a 12V switched power source. Connect the ground wire. Check the cable routing for pinch points and clearance. Use wire ties as needed.
- 12 Reconnect the positive battery cable to the battery.

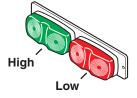

High-Low Switch Cable	Solenoid Cable	Light Bar Cable
#1 (+)	Brown (+)	-
#2 (–)	Blue (–)	-
Green/Yellow	_	Green/Yellow
#3 (Red)	_	#1
#4 (Green)	_	#2

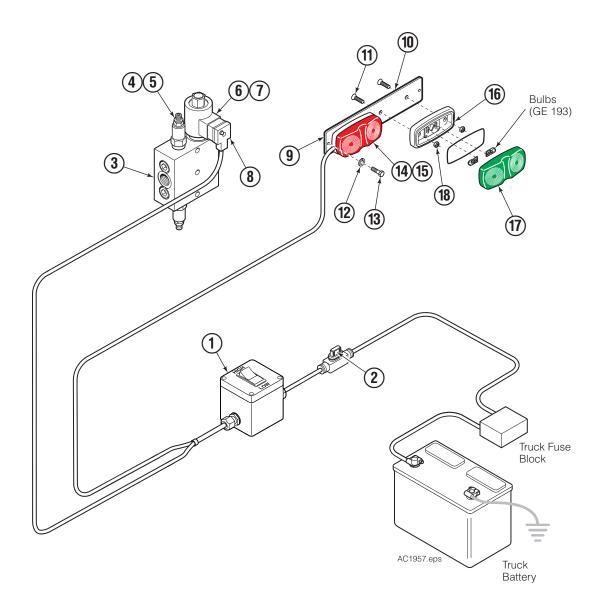

IMPORTANT: Relief cartridges are preset to 1000 psi. Relief pressure for each cartridges must be adjusted for your application.

- 1 Set rocker switch to **LOW**. The light bar will indicate 'green' and the solenoid coil LED will light up.
- **2** Loosen jam nut on No. 2 relief cartridge. Adjust the relief cartridge (3/16 in. Allen Wrench) inward (CW) to raise pressure or outward (CCW) to lower the pressure.
- **3** Clamp a light load and check the pressure. Readjust as required. Tighten jam nut.
- **4** Move rocker switch to **HIGH**. The light bar will indicate 'red' and the solenoid coil LED will remain off.
- **5** Loosen jam nut on No. 3 relief cartridge. Adjust the relief cartridge (3/16 in. Allen Wrench) inward (CW) to raise pressure or outward (CCW) to lower the pressure
- 6 Clamp a heavy load and check the pressure. Readjust as required. Tighten jam nut.
