

LARGE ATTACHMENTS

For your toughest jobs and biggest applications worldwide.

Versatile and durable Heavy Handlers..

When you depend on reliability, uptime, quick service response and timely delivery of parts... choose Cascade.

From paper to pulp to pipe, or from steel to stone to slab, Cascade attachments provide incomparable solutions for handling the heaviest of loads, with capacities to match the largest forklifts used today!

Rotators

Quickly dump and invert loads with ease and precision. Excellent for use in automotive manufacturing, chemical processing, waste and recycling, smelting and casting operations.

. for use in the most rugged settings.

Sideshifters & Fork Positioners

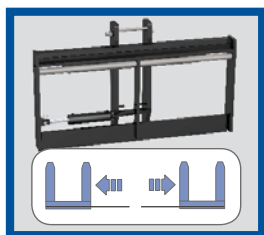

For wide loads, heavy-duty and difficult material handling requirements.

Ideal for operations involving food production, concrete, mining, recycling, gypsum, aluminum, stevedoring, lumber, foundry, and automotive applications.

Easily position the forks for an even wider variety of load handling capabilities.

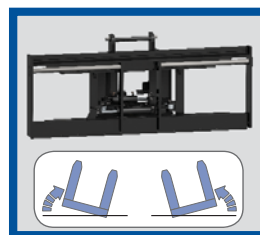

Custom Carriage Designs Available for Your Specific Application.

Additional functionality for fast and efficient handling.

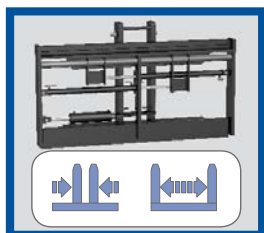

Sideshifting

A rugged hydraulic cylinder anchored to the integral carriage frame moves the sideshifting carriage for precise positioning of loads from side to side.

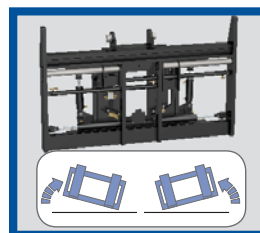

Swingshifting

Used for positioning loads accurately at an angle to the direction of the truck travel. This model swings the carriage forward and back 10°-20° around the vertical axis.

Fork Positioning

Hydraulically actuated fork carriers allow the driver to independently or simultaneously obtain the best fork placement for efficient load engagement. Especially useful on large capacity lift trucks where forks are too heavy to move manually.

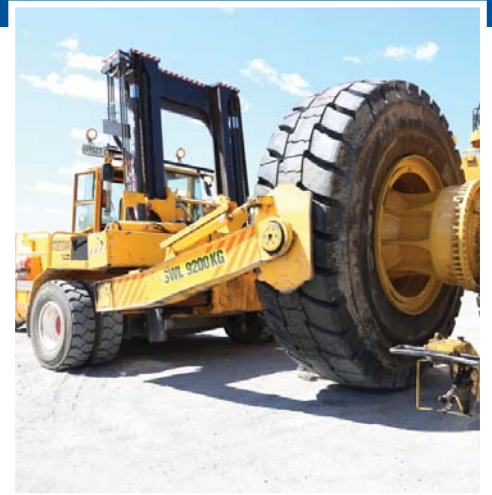

Slope Piling

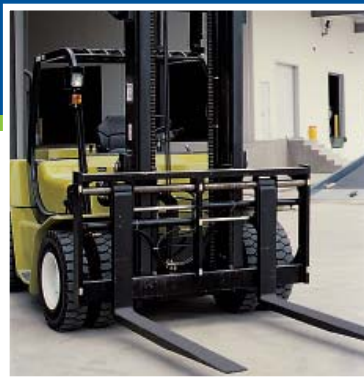

Used to position loads on uneven surfaces, the Slope Piling Carriage provides 10°-20° of up and down rotation on a horizontal axis.

**Tire Handlers
And Manipulators**

An efficient method for
changing, moving or
stacking tires or rims...
no matter what size,
weight or type.

Whatever the application, we can handle it.
