

SPECIAL APPLICATIONS

Custom solutions designed specifically for your application.

Bale Clamp for Tires

Designed for the construction and earth moving industries or any application requiring the need to handle oversize tires.

Bale Separator Clamp

Two Bale Clamps mounted on a main rotating frame. Used to separate bales of frozen product.

Bale Clamp with Folding Arms

Special design that allows the arms to be folded inwards. Used in areas where space is limited.

Upending Tipping Clamp

Features 90° forward tipping for paper rolls, drums, bales and concrete applications.

Our team of engineers design solutions that work.

No matter what industry or application, Cascade is always working on innovative solutions. If you can think it up, chances are our team of engineers can design it for you. If you don't see what you're looking for here, or you have a specific material handling challenge, call us. This is just a small sampling of our special application products.

Vertical Fork Positioner

Forks can be hydraulically adjusted vertically and horizontally to accommodate uneven loads such as truck frames.

Fixed Fork Spreader with Hold Down

Used for handling wide loads such as trusses, rebar and pipe. Has two additional forks and a hold down to provide stability for the load.

Push Loader

Economical and low profile pusher for various applications requiring loads to be pushed from one platform to another.

Hydraulic Bucket

Buckets available with grapple-style hold down arms as well as 360° rotation.

Overhead Grab

Designed to grab various products such as rubber, scrap paper and recycling goods from overhead.

Rotator Boom

Rotator with boom and hydraulic push plate. Designed for loading furnaces.

Snow Plow

Designed to utilize forklift truck for snow clearing. Spring-loaded design. Offered as ITA hook-on or slip-on fork mount.

Bin Dumper

For scrap, produce or practically any application. Featuring hydraulic hold downs, fixed side forks and 360° rotation.

Rotating Hydraulic Bin Hold Down

Used to efficiently secure bins for rotating and dumping.

Pipe Hold Down

Used to secure and stabilize wide loads such as pipes or poles. Available in various configurations and to fit wide range of truck capacities.

Stationary Mast Stand

Available with various attachments mounted such as Fork Clamps, Carton Clamps and Rotators.

Slope Piler

Designed to position loads on uneven ground. Provides up to 10° of tilt up or down.

Whatever the application, we can handle it.

Bagged Seed Handler

Used to load trailers or containers with loads of bagged seed.

Bread Tray Handler

Used in large bakeries and grocery distributors to easily handle stacks of bread trays.

Car Handler

Specially designed Fork Clamp with long forks and adjustable, locking wheel supports. Used to load cars into racking systems.

Fiberglass Handler

Clamps with specially designed arms for handling bagged insulation.

Train Wheel Drive Handler

Efficient design for handling train wheel drive assemblies.

Concrete Handler

Whether you're handling concrete pipes, tiles, pavers, blocks, or pre-stressed concrete beams, we have the solution.

Cylinder Handler

Unique and economical design grabs cylinder from ends for easy transport, also available with rotator.

Mandrel Clamp

Designed to handle steel rolls into and out of racking or printing presses, also used for any application requiring a round object to be cradled.

Rotating Anode Handler

Handles a variety of shapes and sizes. Features include clamp arm frame to grab anode post.
