Cascade Multiple Load Handlers are engineered to help you perform in real working conditions, delivering what you need to move more loads faster while minimizing damage. Handle a single pallet, or spread the forks hydraulically to lift, carry and sideshift multiple pallets side by side.

More flexibility
- Load backrest available in different configurations for handling different kinds of loads
- Full line of Multiple Load Handlers can handle from one to six loads
- Additional options include various fork lengths and load stabilizers

Faster service
- Easy-to-service hydraulic cylinders enable quick servicing
- Interchangeable forks can be rotated for increased life

Longer service life
- In tests, our product lasted 2.5x longer than the previous industry standard – over time, that level of durability translates into a great value
- Full-length, fully enclosed UHMW bearings provide maximum support, reducing wear on bearing surface
- Pin mounted inner forks for optimal strength and better fork movement
- Low cost service
THE CLEAR CHOICE

Move more loads faster, minimize damage and stay competitive.

STURDY
Welded steel frame for increased strength, reliability and reduced load deflection.

LASTING
Bolt-on interchangeable forks for easy servicing, rotating and increased fork life.

DURABLE
Full-length, fully enclosed UHMW bearings for longer life.

FLUID
Inner fork spring mechanism to provide smooth inner fork sequencing.

SECURE
Rigid inner fork mounting for increased fork stability.

FLEXIBLE
Adjustable fork stop blocks to fit different pallet sizes.

VISIBLY SUPERIOR
Arm bars are positioned for better functional and perceived line of sight to give drivers a clear view of the fork tips so they can approach loads quickly and avoid damage.

- Visibility for floor loading
- Visibility for second tier loading
- Visibility for trailer loading
Whatever the application, we can handle it.

Whether loading a truck, transporting pallets, storing in a warehouse or staging products, Cascade Multiple Load Handlers move more loads in less time. These highly versatile attachments allow you to achieve the productivity games of double or triple load handling without sacrificing the ability to handle single pallets. For fast and efficient material handling, choose Cascade.
