J-Series Carton Clamps

- CARTON CLAMP: Capacities up to 4,840 lbs.
- RAZORBACK CARTON CLAMP: Capacities up to 2,000 lbs.
- TIPPING CARTON CLAMP: Capacities up to 2,640 lbs.
- DOUBLE WIDE CARTON CLAMP: Capacities up to 2,500 lbs.
- WGF CARTON CLAMP: Capacities up to 3,469 lbs.
- WGS CARTON CLAMP: Capacities up to 3,469 lbs.

Not all clamps are created equal.
Whether you’re handling consumer paper products, appliances, consumer electronics, wine packaged foods (canned or boxed), chemicals or plastics, Cascade clamps offer a solution. They’re durable enough for the toughest conditions, versatile and easy to service. Carton Clamp models include the CCS, CCD, CRS and CCU models.

**EFFICIENT HANDLING**

*Each Carton Clamp is designed to do a particular job and do it well.*

**Common Clamp Features & Benefits:**

- Secure handling of loads.
- Reduces hydraulic leaks and improves reliability.
- Durable bearings with less maintenance.
- Assures secure and precise mounting.
- Improved hydraulic efficiency.

**Reduced Product Damage**

Load backrest design with 4 point mounting is in the same plane as the arm bars for even contact with the load. (Optional)

**Improved Reliability**

With stronger built corner castings.

**Reduced Maintenance**

On contact pad for pallet handling extending pad life. (Optional)

**Ease of Operation**

Thin arm profile with tapered leading edge for manipulating tight loads between stacks.

**Guaranteed**

Cascade will provide trouble free service on UHMW bearings up to 10,000 hours or 36 months.
The WG Models distribute clamp force more evenly along the pad surface, reducing damage.

**WG Models**
- Designed for the white goods, warehousing, beverage, appliance and electronics industries, the WG Model clamps allow palletless handling, which improves warehouse space utilization. The variety of features and options result in more precise handling, enhanced productivity and less product damage.

**J-Series Carton Clamps**
- Efficient hydraulic system which minimizes energy consumption and maximizes performance.

**Common benefits for both Carton Clamps and White Good Models**
- Improved durability
- Optimal force distribution
- More precise handling
- Reduced product damage

**WG Models**
- Common features:
  - Superior clamp force distribution
  - Visibility
  - Reduced product damage

**WGF Model**
- Single, full depth or tip handling for many different configurations.
- Left single articulating arm
- Right single articulating arm
- Flexipads/Adjusta-Block RH & LH

**WGS Model**
- Single and full depth heavy loads for general handling solutions.
- Left single articulating arm
- Right single articulating arm
- Shims RH & LH

**White Goods Model Shown**

**Increase productivity, reduce product damage.**
Damage Reduction Options

Load Cushion™
Hoist System Accumulator that absorbs shocks and reduces the clamp force required to handle the load. Available in 475 ml (1 pt) and 950 ml (1 qt) sizes.

4-Point Force Distribution Tester
Portable design measures clamp force in 4 quadrants of the contact pad for a reliable measurement. Calibration bar included to ensure equal sensor arm lengths and accurate pressure measurements.

Tilt Control
Automatically controls the angle of the mast and attachment, aligning pad with the load.

TFC™ - Touch Force Control System
TFC™ is an interactive and easy-to-use touch screen system that works in applications where regulating clamp force and pressure control is required.

Volumetric Force Control (VFC)
VFC system automatically adjusts clamping pressure based on volume of the load. This option is designed to reduce damage caused by excessive force, the VFC calculates the size of load and will clamp with the least amount of force. The operator does not need to judge the clamping force with manual controls, it is completely automatic.

J-Series Clamp Options
- Custom opening ranges and frame widths.
- Custom arm lengths, heights and pad surfaces.
  Application-specific contact pads (sizes & surfaces).
- Frame bumper for extra protection when handling loose loads.
- Various ISO mounting options including class III and quick-disconnect features.
- Independent arm control.
- Regenerative valve for increased arm speed on low flow electric trucks.
- External sideshift available.
- Alternate valve configurations for left hand or right hand third and fourth function hydraulic installation.
- Application-specific customization.
