

An efficient way
to transmit both
electrical and
hydraulic supply
over the mast.

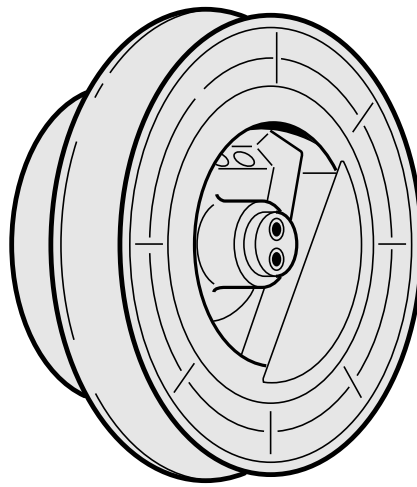

Control up to six hydraulic functions with a single reel.

APPLICATIONS

Cascade's 6-N-1 Cable-Hose Reel can control up to six hydraulic functions when used in conjunction with the proper solenoid arrangement. The 6-N-1 Reel is an efficient, economical and space-saving method of transmitting both the electrical and hydraulic supply over the truck's mast on a single reel. Using one 6-N-1 Reel eliminates the need for multiple reel installations, resulting in reduced cost and an improved mounting configuration.

FEATURES

- Well sealed rotary joint and durable seals
- Excellent hydraulic flow
- Rugged, durable construction
- Fully contoured metal flanges protect cable-hose line from chafing
- Unique hose guide design prevents hose kinking
- Non-rotary joint carriage terminal eliminates need for joint
- Brushless connections are completely enclosed
- Hose fittings and electrical connections are readily accessible
