at a great value.

Take a Cascade for a Second Spin

CASCADE REMANUFACTURED ATTACHMENTS

Trying to invest in pre-owned equipment to save money?

Try a Cascade. Each of ours has passed the Cascade Remanufacture Process, the most rigorous in the industry. So you know it's been returned to original factory specifications. We disassemble, steam clean and shotblast each Cascade Remanufactured Attachment, then inspect and repair welds and parts, replace hoses and fittings, and test. If you want to invest in Cascade quality at a great value, call us.

Our remanufactured attachments have a 6 month warranty, and are shipped with detailed installation instructions. Product registration cards are included to order your service and parts manuals. Complete parts and service information is maintained on every unit. Replacement parts are available through the Cascade parts depot.

Cascade Remanufacturing will guarantee lease residuals up to 25% of list price for most standard price list items (excluding sidershifters, hose reels and accessory items) in cases where the leasing company will not place a residual on the attachment.

Modifications to existing attachments and repairs to damaged attachments will be performed accurately and efficiently through our remanufacturing operation.

THE REMANUFACTURING PROCESS

The process begins with an used Cascade attachment that is inspected to see that it is a candidate for remanufacture.

Steam cleaning: All oil, grease and dirt is removed.

Disassembly: Every attachment is completely disassembled, steam cleaned again and visually inspected.

Shotblasting: Component parts are returned to bare metal.

Magnufluxing: Every weld is carefully inspected to reveal possible defects invisible to the naked eye

Repair & Remanufacturing: Parts are repaired or replaced to see that all factory specs are met.

Hydraulics: All hoses are replaced. Cylinders and valves are remanufactured and tested.

Reassembly & Testing: All components are reassembled and functionally tested and checked for conformance to Cascade engineering standards.

Painting: Each unit receives a final coat of lacquer paint that serves either as a final color, or as a base primer for your own color preference.

Wide range of attachments available for short and long term rentals.

ATTACHMENT RENT TO OWN PROGRAM

Need a short term rental for seasonal business fluctuations or a long term lease so you don't have to tie up capital in purchasing the attachment?

We have a dedicated fleet of Cascade products in stock in multiple quantities to support your short and long term rental needs.

Our fleet is maintained and regularly updated with new equipment so you only get the best most current attachments.

Attachments rented to Cascade dealer network only.

CASCADE ATTACHMENT RENTAL FLEET
