

Leading the world in quality lift truck attachments, forks and accessories.

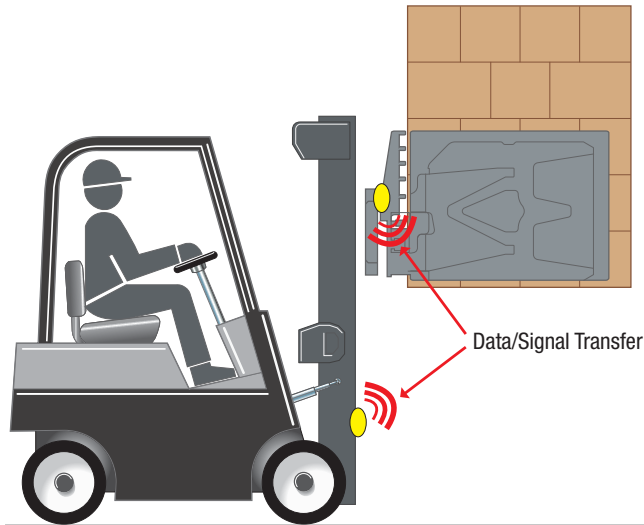

The Possibilities are Limitless...

When looking to partner with a company that can provide custom solutions for your material handling challenges, count on Cascade. Our industry exclusive Wireless Power & Communication System is a highly flexible tool that can be tailored to address your specific needs.

ADD UNLIMITED FUNCTIONALITY

TO YOUR ATTACHMENT WITHOUT THE NEED FOR OVER-THE-MAST WIRING SYSTEMS

WIRELESS DIGITAL RF SWITCHING (TWO-WAY)

Wirelessly operate basic attachment accessories directly from the operator's cab.

- Activate solenoids for alternate attachment functions, set clamp forces, etc.
- Wirelessly power up accessories (such as lights, scanners, etc.)
- Customize to your specific needs.
- Feedback from attachment sensors.

WIRELESS CANbus COMMUNICATION

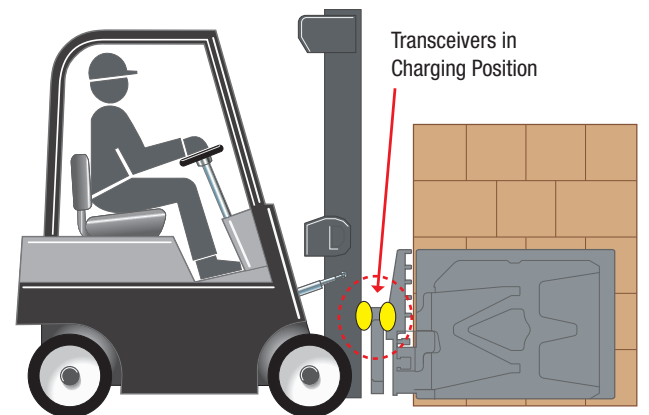

Utilize CANbus technology to integrate nearly unlimited functionality to your attachment.

- Wireless CAN node functionality is protocol independent. (supports J1939, Device Net, Can Open)
- Use in conjunction with advanced sensor arrays and output functions using CAN.

INDUCTIVE BATTERY CHARGING

Improve operating costs and productivity through wireless charging (inductive charging) of lithium-ion batteries used to power attachment accessories and controls.

- Eliminate damage, downtime and costly repairs of over-the-mast wiring systems.
- Integrated battery charging system eliminates the need for multiple batteries and external battery charging devices.
- Increases overall productivity by eliminating the need to remotely recharge batteries.

Call us at 800 CASCADE (227-2233) to learn how we can customize a product handling and damage control solution based on your specific application.
