

METALS

Metal is your business. Making attachments to handle it is ours.

Lift truck attachments for all your forging needs.

Whether you're handling metal ore, minerals or scrap... Cascade has you covered, from Aluminum to Zinc.

We design a wide variety of heavy-duty products specific to the metal industry that operate under even the harshest of conditions.

Our commitment to quality and customer satisfaction has made us the leading worldwide manufacturer of lift truck attachments and related products. For more information on how Cascade lift truck attachments can help you move your metal assets more efficiently, contact Cascade.

Forging Manipulators

A safe and efficient method of handling forgings and castings when loading and unloading furnaces and forging presses.

Rotators

Add 360° revolving motion, in both directions, to truck forks. Used in manufacturing for load inverting and dumping loads.

Roll Clamps

Cascade offers a full line of Roll Clamps to handle steel coils regardless of diameter, weight or type of material.

Fork Clamps

Operates both as a Clamp and a Fork Positioner. Awkward loads can be clamped between the forks. The ability to position the forks speeds pallet handling and reduces wear and tear on the pallets.

Fork Positioners

Quick and accurate fork positioning without leaving the driver's seat allows faster load handling with reduced product damage. A Cascade fork positioner increases productivity and helps reduce damage.

Fixed Fork Spreaders

Used for handling wide loads such as trusses, rebar and pipe, the Fixed Fork Spreader has two additional forks to provide stability for the load. Quick Disconnect makes it easy to mount and detach.

Whatever the application, we can handle it.

Weigh Forks

Effective on practically any lift truck with an ISO hook-on carriage. Being wireless, the system can be installed onto any forklift in a matter of minutes. These unique and innovative forks let you weigh your product as you lift it, enabling you to view and track the weight of individual loads and total weight of multiple loads.

Magnetic Fork Covers - DAGS

Ideal for handling a wide variety of loads. Designed for use in any industrial sector where palletless products could be damaged from contact with bare forks. When confronted with an awkward load like metal boxes or cages, DAGS can be installed in a matter of seconds.

Pipe Hold Downs

Designed to swing into position when needed to securely clamp a load of pipes. Prevents dropping or slipping of large loads, even over rough terrain or inclines.

Coil Booms

Allows efficient and easy transport of rolled materials, such as steel or pipe.
