

# PORTS & HARBORS

Cascade attachments help you navigate your way to efficiency.

# *Lift truck attachments for all your stevedoring needs.*

## ***Innovative Solutions To Move Cargo Quickly and Efficiently.***

Whether it's coming in by ship, rail, truck or barge the port industry faces a multitude of material handling challenges. Improving throughput, reducing damage while loading, and unloading and moving cargo are critical elements for an efficient and reliable supply chain.

Cascade is an industry leader in manufacturing the lift truck attachments designed specifically for your application.

When only the most reliable and efficient material handling products will do, contact Cascade.

### ***Harbor Clamps***

Special fork clamps designed to meet the high demands of stevedoring applications. Feature profiled, toe-in forks for knifing between loads and clamping various sizes of crates and bales.

### ***Pulp Bale Clamps***

For high-volume, damage free and secure handling of pulp bales and unitized pulp in stevedoring, mill, warehousing, shipboard and transporting operations.

### ***Tower Clamps***

Designed for mills and stevedores where multiple roll handling is essential. Handle from two to eight rolls of newsprint, coated stock, kraft or linerboard.

### ***Multiple Pallet Handlers***

Allows driver to use the same lift truck to handle either single or double pallet loads. Spreading the four forks allows handling of two pallets side by side. When brought together, the four forks convert to two forks ready for single pallet handling.

### ***Fork Clamps***

Operates both as a Fork Clamp and a Fork Positioner. Awkward loads, such as crates, and bales can be clamped between the forks. The ability to position the forks speeds pallet handling and reduces wear and tear on the pallets.

### ***Fork Positioners***

Quick and accurate fork positioning without leaving the driver's seat allows faster load handling with reduced product damage. A Cascade Fork Positioner increases productivity and helps reduce damage.

***Whatever the application, we can handle it.***

### ***Magnetic Fork Covers - DAGS***

Ideal for handling a wide variety of loads. Designed for use in any industrial sector where palletless products could be damaged from contact with bare forks. When confronted with an awkward load like metal boxes or cages, DAGS can be installed in a matter of seconds.
