

# PACKAGING

From boxes, bags to bulk, Cascade has your package handling solutions.

Lift truck attachments for all your package handling needs.

# Versatility comes standard.

***Cascade's innovative lift truck attachments offer reliable and efficient handling for consumer-packaged goods, food packaging, industrial packaging and more.***

From ultra-light capacity paper roll clamps ideally suited to handle packaging materials such as laminated plastic wrap and aluminum foil, to mobile weighing products that weigh on the go, we have the solution for you.

## ***Sensor Forks:***

With a wireless camera embedded, Sensor Forks offer lift truck operators the visibility and precision for maximum efficiency while handling loads. Sensor Forks allow you to see exactly where your fork meets the load in order to reduce damage to product and pallets. Improve performance in any situation where fork tip alignment or fork angle are critical to successful operation, including: high stacking, double deep pallet racking, low light environments, bin post alignment, boat handling, and more.

## ***Ultra-light Capacity Paper Roll Clamps:***

Our compact 3H Paper Roll Clamp is perfect for paper converting and packaging, including food packaging where sanitary handling is a mandate. This innovative and versatile design is ideally suited for handling ultra-light paper rolls and is available in powered or manual versions with integral or class II carriage mounting configurations, for use on stand-up trucks, powered and manual, walkie-style equipment.

## ***Weigh Forks:***

Weigh Forks are designed to save time and money by combining transport and weighing into one easy step. View and track the weight of individual loads or multiple loads using integrated Bluetooth® technology. Commonly used for incoming goods control, overload prevention, dosing, filling, waste management, order picking and inventory control, weigh forks are ideal for handling anything that requires weight related data.

## EXTEND THE REACH

*With Cascade-KOOI® Reachforks, flatbed trailers can be loaded and unloaded from one side.*

Increase the efficiency of your lift truck by using Cascade-KOOI® Hydraulic or Manual Reachforks or Hydraulic Fork Extensions. With Reachforks, trailers, trucks and trains can be loaded and unloaded from one side for increased efficiency. Usage of warehouse space can be improved by taking advantage of double-deep racking and utilizing Reachforks®.

Cascade-KOOI® Hydraulic Fork Extensions are designed to handle different pallets (GMA/Block pallets) from either the long or short side of the pallet. Simply adjust the fork length to your long pallet or multiple pallet depth and pick the load.

## EASILY HANDLE PALLETS OR SLIP SHEETS

*Increase the capabilities of your lift truck by using Cascade-KOOI® Rollerforks.*

These specialty forks use a retractable internal rolling mechanism to effectively carry a wide variety of loads, including slip-sheeted loads and pallets for boxes, cartons and bagged goods. These forks hang on standard lift truck carriages, are lightweight and versatile, making them a cost-effective solution that increases production and efficiency.

# Palletless Handling

## Carton Clamps

Designed for consumer paper products, packaged foods, chemicals or plastics. Carton Clamps allows palletless handling, and saves money on pallet purchasing, maintenance, shipping and storage. They also improve warehouse space utilization.

## Push/Pulls

Allow you to ship, receive and warehouse unit loads on inexpensive slip sheets rather than pallets. Push/Pulls typically handle bagged products such as seed, agricultural products and cement, cased food, electronics, cosmetics and bottled beverages.

## Clamps

Handle nearly any product such as cotton, wool, corrugated, newsprint, rag, hay, tires, recycling scrap, bales, textiles, pulp and more. No matter what your application demands, Cascade offers a wide variety of rugged clamps, all guaranteed to excel in nearly every application.

# Pallet Handling

## Bulk Box Handler

Versatile attachments used to handle produce, piece parts, and other items where a box attached to a pallet requires support of multipurpose arms for rotating and dumping.

## Multiple Load Handlers

Allows driver to use the same lift truck to handle either single or double pallet loads. Spreading the four forks allows handling of two pallets side-by-side. When brought together, the four forks convert to two forks ready for single pallet handling. Well suited for truck trailer loading and unloading. Also available are Single-Double-Triple Pallet Handlers, Long Forks and High-Capacity models.

## Layer Pickers

When building mixed load pallets, the Cascade Layer Picker handles single layers or multiple layers of canned, bottled and boxed products. Models include: Swing, Mono-Mast Swing, Stationary Side and Carriage Mount, Fork Mount and Magnetic Layer Pickers. Cascade's Swing models offer a 180° swing to enable picking from both sides of the truck.
